## **DECLARATION**

I hereby declare that the project entitled, “Insurance Management” for the course CSE326 is submitted by me (Samson Kwaku Nkrumah, Yogendra Katara and Suarabh Rai) to Dr. Dhanpratap Singh of Lovely Professional University Department of Computer Science and Engineering, lecturer of the course CSE326. Is an authentic project solely carried out by us to fulfilling the course requirement. Every single detail in this project is based on our own way of implementing the problem

Samson Kwaku Nkrumah(11919729)

Yogendra Katara(11905058)

Suarabh Rai(11905175)

<b>5. DEDUCTIONS.....</b>	<b>10</b>
<b>6. CONCLUSION.....</b>	<b>10</b>

## **INTRODUCTION**

**Insurance** is a means of protection from financial loss. It is a form of risk management, primarily used to hedge against the risk of a contingent or uncertain loss.

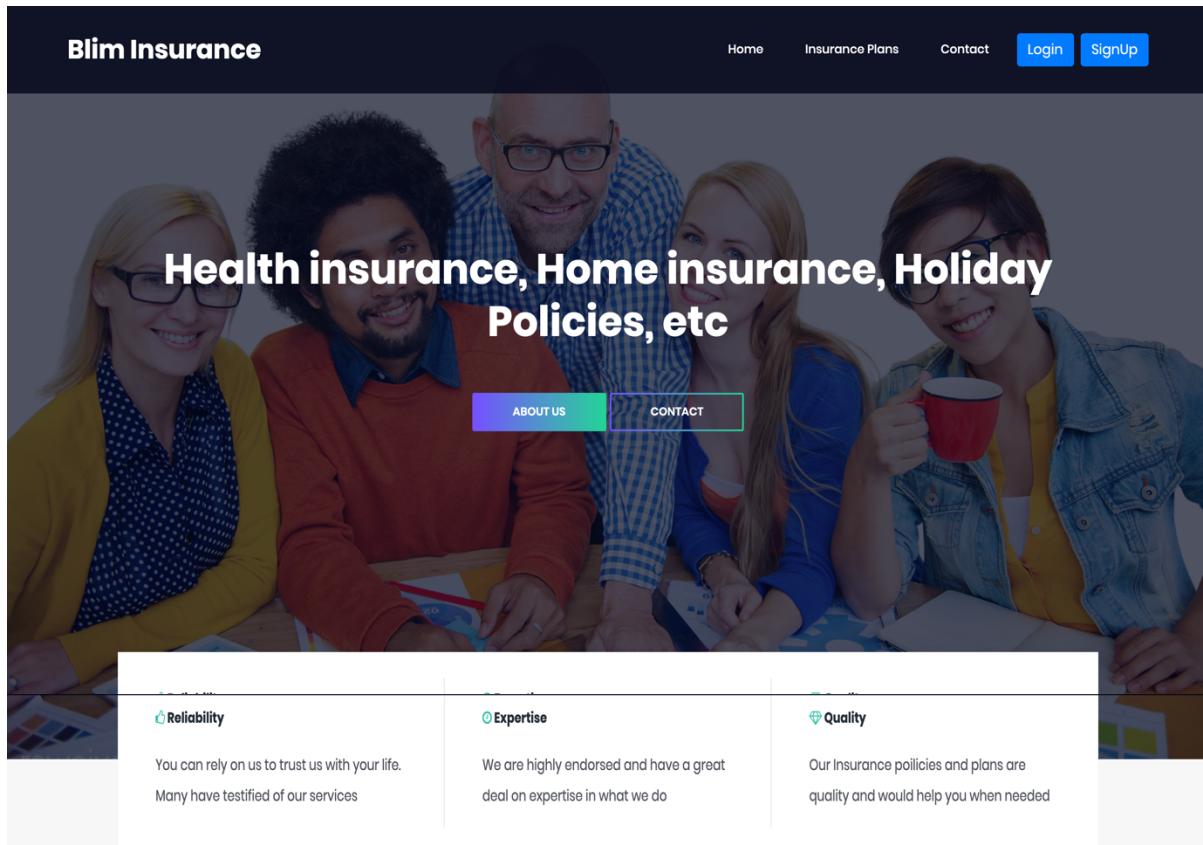

The purpose of this project is to build a software for handling the management digitally. This helps in many ways thereby bringing people all over on to a single platform and easily mange their insurance.

Insurance management is a non-technical term used to describe insurance brokers and providers and the insurance products they offer buyers. Insurance providers sell various insurance solutions to business and consumer buyers. There are many other insurance platforms but what makes ours outstanding is the insurance policies that we have. There are so many insurance policies in our app, that helps

We name our project as **Blim Insurance**. Is just a unique name we have taken. Our pages are responsive and fits well in mobile devices as well. We used popular frameworks and libraries such as bootstrap, jquery, fontawesome, vendor, etc. Most styles were done by different group members thereby providing more stylesheet(css files in the project).

## Homepage

The homepage also known as the landing page, is the page that viewers first see when they visit the website. It was created by Samson Kwaku Nkrumah. It carries the navigation to contacts page, insurance plans page, login page, and sign up page.

## CONTACTS PAGE

This consist of the page where visitors of the website or user of the site can contact the system administrator in case of any problem or issue or bug in the page. And also contact the Insurance agency for further questions on insurance plans and policies. This page was developed by Arijit Mandal and Samson Kwaku Nkrumah

Connecting...

## **DEDUCTIONS**

The pages were created with the help of some popular frameworks and libraries such as bootstrap, vendor, fontawesome,jquery. All though some of the pages have been created, not all were created because that would be much more pages, such as;

- i. Userpage
- ii. User profile page
- iii. Settings page
- iv. Insurances page(Purchased insurances)
- v. Insurance page(Form filling page)

And many other which we haven't even considered. Which would involve much logic and validations done by the developers.

## **CONCLUSION**

In conclusion this project was done to fulfilling the course requirement of CSE326. This project was solely done by the group members with intensive work and thinking. Our Stylings are also responsive and fit nicely in mobile and other devices as well. We are hereby taken charge of this project as our own work. If Any question is needed you can contact any of the group members and the problem will be resolved. Thank you.
